# Case Study Mercuri International

### The challenge

- Laurent is responsible for 4 Plaza bowling units: 3 in France (Grand Quevilly, Saint Maximin, Reims Thillois) and 1 in Belgium (Wevelgem).
- 2013-2014 : HR construction (the right person at the right place) => Done
- 2014-2015 : to confirm/to anchor (cost mgt) => Done
- 2015-2016 : development diversification (turnover) => next challenge
- With the vision to offer in 2019 a 'multientertainment-center' experience to both B2B and B2C customers, an adapted commercial approach is necessary (intervention MI).
- Knowing that internal sales is according to expectation but that the bowling income stagnates, the focus is to obtain the objective in developing B2B activities (multi entertainment platform => plan exist already). As today the B2B revenue is 11.5% of the total turnover (3 French Units). The intention is to increase this % up to 30 à 40% by the end of 2017.

>

## **Our solution**

To realize the ambitions with a plan that matches Plaza Bowling's hands-on approach, we proposed :

- 1. An unbiased analysis of the facts
- 2. Tailor made workshops, with an innovative input
- 3. Follow-up possible by means of individual coaching to confirm the implementation
- An approach based on your philosophy → hands-on, pragmatic and very concrete
- 5. A plan immediately applicable with a direct impact on the results
- 6. A plan that makes changes possible in an inspiring, challenging and encouraging way and that will reinforce the dynamics between all team members
